

**Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the application.

**Listing of Claims:**

1. (withdrawn) An equipment utilizing water comprising:  
an operation section provided on top or side of a main body of the equipment utilizing water; and  
an outer member including a transparent member, a transparent film formed thereon, and a colored decoration provided on a surface of the transparent member opposite to the transparent film, wherein the operation section is comprised of only the transparent film.
2. (withdrawn) The equipment utilizing water of claim 1, wherein a decoration is added to a portion of the transparent film.
3. (withdrawn) The equipment utilizing water of claim 1, wherein the decoration provided on the surface of the transparent member opposite to the transparent film is formed by printing or painting.
4. (withdrawn) The equipment utilizing water of claim 2, wherein the decoration provided on the surface of the transparent member opposite to the transparent film is formed by printing or painting.

5. (currently amended) ~~An equipment-utilizing water~~ A rice cooker comprising:

an operation section provided at top or side of a main body of the ~~equipment-utilizing water~~ rice cooker; and

an outer member including a transparent member, a transparent film formed on a top surface of the transparent member, and a colored member integrally formed on a bottom surface of the transparent member, wherein the outer member has a portion comprised of only the transparent film and the operation section is disposed at the portion comprised of only the transparent film, wherein the colored member is formed of ~~a material identical to that of the transparent member or a material~~ that is tightly formable formed with the transparent member, and the transparent film, the transparent member and the colored member are being made of resins by an integral molding method, and wherein the transparent member has a thicker thickness than that of the transparent film such that a decoration provided on a portion of the transparent film is projected through the transparent member onto the colored member to be three-dimensionally displayed ~~the colored member being connected to a cover of the equipment-utilizing water.~~

6. (currently amended) The ~~equipment-utilizing water~~ rice cooker of claim 5, wherein a connection structure for fixing the outer member to the ~~equipment utilizing water~~ rice cooker is provided to the colored member, wherein the connection structure includes a claw and/or a boss into which a screw is screw-fitted.

7. (canceled)
